NQ Engineering and Fabrication Pty Ltd delivers results built on a platform of experience, quality customer service and an established resource base. Bringing together the synergies within design and fabrication we can deliver on a scope of works developed over eight years business operation. Lead by John Gammie with more than twenty years experience in this industry NQ Engineering and Fabrication Pty Ltd is unique in their capacity to deliver all aspects of design, fabrication and delivery of products.

**Scope of Works:** Our customised approach to fabrication has seen a completely diverse scope of works. No job is too big or small, specialising in all areas we can work with one piece of steel through to 40t depending on requirements. A sample of works within our capacity includes:

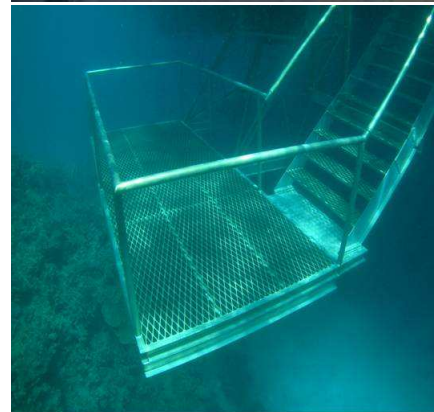

Industrial	Marine	Vehicle	Domestic	Minor Projects
Sheds Safety harness tie points Tanks	Boats Underwater platforms Fuel tanks Canopies Pontoon boats	Roof racks Trailers Cages Water and fuel tanks	Stair cases Step stringers Houses Hand rails Automatic gates Gated communities Suspended gates	Cleats Pins Joins Bike racks Signs Bolt holes

Our approach provides the same level of quality across minor details through to heavy steel fabrication, construction and erection.

**Resources:** Our most important resource is our highly qualified and competent team. Across all areas each team member contributes to providing innovative and creative solutions to customer requirements. Quality of work is achieved through a high attention to detail and expert workmanship. Each team member has more than ten years experience in this industry with a proven ability and access to equipment such as:

Press  
Fabricating  
Semi auto band saws  
Guillotine  
Plasma cutter  
Mobile welders

Roll  
Cutting punching  
100t break press  
Lathes  
80t punching shear  
Scaffolding towers

Designing, fabricating, engineering quality aluminium, steel and stainless steel products

**Design to Delivery:** From all aspects of design through to complete delivery and practical completion we manage fabrication and construction of all steel, aluminium and stainless steel products. A complete in-house service delivers customised results, meeting the exact specifications of customers. We use 3D AutoCAD to completely customise drawings to meet customer requirements. This creates an opportunity for customers to individually select and adjust any aspect of fabrication to meet their needs. All drawings are completed to engineering standards and meet all Australian standards and building codes.

NQ Engineering and Fabrication Pty Ltd builds from initial concept and designs individualised products that meet your specific requirements. Our in-house design function ensures the most efficient and effective use of equipment, resources and reduces costly mistakes. A quality system and commitment to safety ensures the protection of staff and resources.

**Building on Quality:** We achieve results through building on quality workmanship. Our reputation throughout North Queensland in the delivery of custom-made engineering and fabrication products is built on a commitment to managing the smallest detail through to the heaviest steel engineering. Our products last, standing as testament to the quality control we can bring to every project.

**BOELUBE:** NQ Engineering and Fabrication Pty Ltd are exclusive distributors of this product that fights friction at the interface of the cutting-edge and the workpiece. Significantly increasing the life of consumables and equipment this product aids the cutting by enhancing the surface and reducing the heat transfer.
